Analyzing irrigation data:

- 3/12 04 658 145
- 4/12 10 700 158
- 5/12 54 378 96

The water level is maintained at 26 feet.

The sound alerts much in the same tone as the irrigation but the roar is louder, not sustained. The system's component with modulated notes that make the howling very much more startling than those of the preceding.

Notes from Juilla Chapas.
A Trapiche costs $500. Can make 16 arrobas of sug. or 60 of panela a day. 2 weeks 8 miles of horses.
Also 2 boys at half pay to work in trapiche & 2 men at 8 dollars.
4 men cut scuply cane to keep 8 kettles going.
Each arroba of sugar is 6 litros molasses for making Aquavintia.
Panela gives 90 molasses.
70 litros molasses gives 15 litros Aquavintia.
Messo about 700 pesos up to 2,000.
They get $3 a month with a house, balmudro, corn, fed meat, and salt. His tools & land to plant corn.
At Ocuilapa a tara in farm, patches for cleaning is 30 x 50 varas.
At Ocilapa they plant 1000 Coffee trees, 200 saplings, on 100 varas square. To clean this needs 7 men a day. Holes are made 12x12 in 0.5 deep. 100 are made asatana in a day. It will take 10 men a day to plant 1000 trees when holes are made. Needs 4 to 5 cleaning a year.

Leonardo Luis
Sent 100 men to him at Quiaua and notes used rice to Sochil.
Sent for City of Mex.
